

# SIFATUL RABBI

## SUMMARY

I'm a passionate full-stack developer with the ability to deliver business needs through software solutions. I have a robust foundation in web development and cloud computing. I'm constantly challenging myself to improve and take on demanding tasks. I am eager to learn more and collaborate with dynamic teams to grow collectively.

## SKILLS

Quick Technological Adaptability ·

Problem Solving ·

Effective communication

JavaScript · TypeScript · Go/Golang

Node.js · Express.js · Gin · WebSockets ·

gRPC · REST · GraphQL

React · Vue.js · Next.js · TailwindCSS ·

SCSS · Bootstrap

PostgreSQL · MongoDB · Redis

Docker · Git & GitHub · GCP · Linux

## EXPERIENCE

### Full Stack Developer

11/2022 - Present

#### HelloScribe

Florida, USA

JavaScript, Node.js, Express.js, Auth0, Vue.js, MongoDB, TailwindCSS, SCSS

- Quickly learned system needs, added important features, and fixed bugs, leading to more active users.
- Led the transition to v2 of the system, which includes migrating from Vue2 to Vue3, upgrading from Node.js 12 to Node 18, and enhancing data models for scalability.
- Improved user sign-in by adding Auth0 and strengthening authentication & authorization in both backend and frontend.
- Collaborated with a team of four, reviewing code, synchronizing changes, and assisting in feature integration to the platform.

### Full Stack Developer

04/2022 - 08/2023

#### X Booker

London, UK

TypeScript, Express.js, Next.js, Firebase, GCP, Docker

- Built a SaaS platform for property survey businesses, making tasks smoother and engaging for the users.
- Set up login using Google SSO and Firebase; added third-party storage for files and used Firestore as the database.
- Added Google services like Calendars, Gmail, and Maps to the platform.
- Combined system automations with key external features and managed app deployment on GCP Kubernetes using Docker.

## PROJECTS

### Hotel management system

JavaScript, React, Node.js, PostgreSQL

- Developed an MVP of a Hotel Management System (HMS) for a boutique hotel with a landing page for room browsing and booking.
- Enabled admins to view and assign bookings, triggering automated email notifications to clients upon room assignment.

### Meta Workplace bot

JavaScript, Node.js, Meta API

- Designed a workplace bot to decipher acronyms, such as converting "SKU" to "stock keeping unit".
- Configured the bot to respond only when directly mentioned in a group with the format @bot [acronym], ensuring no unsolicited replies.

### Social Media app MVP

JavaScript, React, Express.js, PostgreSQL, Docker

- Developed a specialized social media app tailored for doctors, allowing account creation with profile pictures and detailed descriptions.
- Enabled users to follow peers, engage with posts through likes, comments, and shares, and support multimedia content including images, videos, and audios.
